**STATEMENT REGARDING PRIORITY CLAIM**

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Attorney Docket No. 2416-00300  
Date: July 27, 2005

Sir:

The above-identified patent application was filed on March 19, 2004 as a continuation-in-part of abandoned U.S. Patent Application 09/444,937, filed November 22, 1999. The above-identified patent application also included a priority claim to the '937 patent application in the specification. A petition to revive 09/444,937 was submitted on the same date. This petition to revive was dismissed on June 23, 2004.

Subsequently, a petition to revive abandoned U.S. Patent Application 09/990,194 was submitted on October 29, 2004. This application was filed on November 21, 2001 as a continuation of the '937 patent application and subsequently went abandoned on November 18, 2003 for failure to timely respond to a Notice to File Missing Parts. In the petition to revive this application, the response to the office action was declared to be the filing of the above-identified patent application. The petition to revive was granted on May 20, 2005. The decision letter contained the following statement:

In view of the statement that the reply is the filing of a continuing application, the ... application is being revived solely for the purposes of continuity. As continuity has been established by this decision reviving the ... application, the ... application is again abandoned.

On May 25, 2005, a preliminary amendment to add a priority claim was submitted for the above-identified application. This preliminary amendment adds a priority claim to the '194 patent application to the text of the specification. Because of the unusual facts in this matter and because

155915.01/2416-00300

this latter priority claim is made after the time period specified in 37 CFR 1.78(a)(2), Applicants called Retta Williams, the Petitions Examiner who granted the petition to revive the '194 patent application, on July 27, 2005 to verify that continuity, and hence the right to a priority date of November 22, 1999, for the above-identified patent application was indeed established by the decision letter. Ms. Williams stated that the decision letter established continuity for the continuation-in-part application named in the petition to revive, namely the above-identified patent application. Applicants therefore submit that with the filing of the preliminary amendment to correct the priority claim of the above-identified application, all necessary steps have been taken to establish that the above-identified application is entitled to claim the benefit of the November 22, 1999 filing date.

Respectfully submitted,

Ellen Baker
